

Principle

The reinforced rubber ball is the heart of this valve. This ball in the designed path of the valve moves freely and promptly reacts to the ON & OFF of the pump. The ball moves to open position when the pump starts & allows free flow of liquid without any interference. (Fig. A) As the pump stops, the ball seats firmly against the metal seat due to its own weight & back pressure of the liquid (Fig B) This results in DROPLESS sealing.

Features of the Valve

- New generation valve with unique and non-conventional design.
- Suitable for a very wide range of applications like slurry, sewage, paper, chemical, water supply, agriculture, muddy water, slurry, paper stock, viscous liquid and clear water.
- Robust and very simple mechanism.
- A floating reinforced rubber coated ball is used instead of hinge-pin-disc.
- Highly sensible to arrest flow with perfect sealing.
- Very low head loss
- Non clogging and self cleaning mechanism
- Maintenance free
- Power saving
- Large solid handling capacity
- Dimensionally conforming with DIN 3202-F6 / EN558-1-S48 / IS 5312
- Installation can be vertically or horizontally
- Operates silently upto 80 oC
- This valve has a quality for withstanding consistent performance and longer life.

Pressure rating

Size	Rating
25 - 125NB	PN 1.6
150 - 300NB	PN 1.0
350NB	PN 0.6

For CI Construction.

Part List / Materials of Construction

Part	Description	Standard	Special
1.	Body	Cast Iron GG 25	St. Steel, Cast Steel
2.	Cover	Cast Iron GG 25	St. Steel, Cast Steel
3.	Ball	Nitrile Rubbercoated	EPDM, Neoprene
4.	Cover Ring	Nitrile ASTM D2000	Butyle, Viton
5.	Ball Seat Ring	L.T.Bronze LTB2	St. Steel, Hard Rub.
6.	Fasteners	Carbon Steel CL4	St. Steel
